
HEATSHIELD Insulation **DESSF/NM/6MM/SILICA**

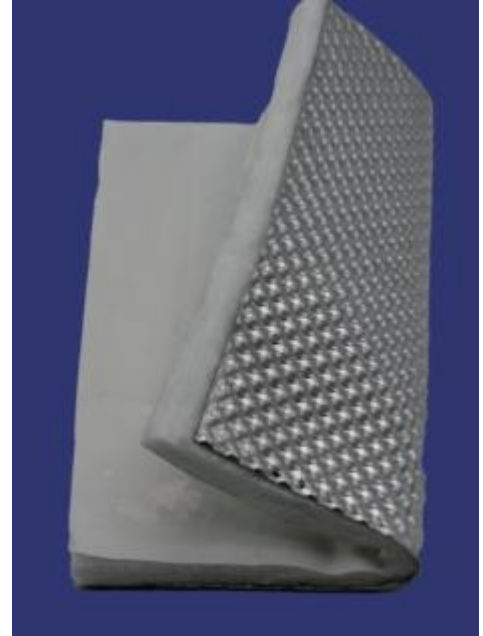

Description

Stainless steel heat shield with adhesive is made from heavy duty stainless steel and thick Silica fibre insulation, with an adhesive backing.

Application

Used on:

- Fire walls
- Floor Pan
- Transmission tunnel
- Air Intake box
- Floor pan (Underneath vehicle)
- Turbos
- Anywhere insulation and heat reflective properties are needed

Technical Data	
Material	Stainless Steel, Insulation
Continuous Temperature	1100°C
Melting Temperature	1650°C
Standard Thickness	6mm
Thickness	6, 10, 12, 15, 20,25mm
Length	MAX: 30m roll
Colour	Natural
Cutting Tool	Scissors/Snips

Note: Custom size on request
