

TECHNICAL DATA SHEET

Fiberglass Insulation Tapes Style **DETLA and DET0082KBSA series**

DETLA and DET0082KBSA fiberglass (E Glass) tapes are a non-asbestos product, manufactured from highly texturized yarns, specially developed for high temperature applications. These tapes are a knitted construction to retain a high degree of softness and flexibility and spongy compared to cheaper woven tapes. Applications include thermal gasket seals etc.

Popular choice for boiler door seal requiring a more resilient high temperature seal compared to cheaper woven tapes that do not seal as well nor last as long against high velocity hot air flows.

Fiberglass tapes are resistant to oils, solvents and most chemicals. Avoid direct contact with live steam.

Service Temperature	Constant Max	*500°C - 550°C
Physiologically Harmless refer MSDS		Yes
Combustibility		Non combustible
Yarn		fiberglass continuous filament-texturized fiber
Available Stocked Sizes		<ul style="list-style-type: none"> • DETLA256/25, 25mm x 6mm x 25m • DETLA329/25, 32mm x 9mm x 25m • DET0082KBSA, 8mm x 2mm x 50m
