

TECHNICAL DATA SHEET**DARCO WELDING SCREENS****Description**

Darco Welding screens and curtains provide a protective barrier between the welding area and general workplace where workers may be exposed to welding hazards.

Adheres to standard **BS EN 1598:2011**

Use

- To provide optical protection when visibility is required for the casual viewer or someone passing by. It is formulated to disperse Arc image and allow light back into work area. It can be fitted on the metal frame or hung on orbit to form a flexible welding screen.

Materials

- Transparent flame-retardant top grade Vinyl processed with a colour dye, flame retardant chemical and UV absorber – PVC (Red or Green)
- Welded plastic eyelets (Except on full roll - 1.8m x 50m Roll)

Properties

- Stop all UV radiation and blue bright light durability

Application

- For plasma cutting or bright welding application
- For most medium amperage welding applications

Technical data	
Thickness	0.4mm
Sizes	6ft x 6ft 6ft x 8ft 6ft x 9ft 6ft x 131ft (1.8m x 50m Roll)
Colours	Red Green Amber
