

TECHNICAL DATA SHEET**E Glass EGRLOOSE series**
Description and AdvantagesProduct Description

Fiberglass chopped roving rated to 600°C after texturized, has good acoustic absorption. Typically used with Darco SS434WOOL/M, 434 s/s wool, medium grade 80 -120 micron, 100 mm wide, rated to 850°C continuous. Combination of the two materials can operate from 650°C up to 800°C.

Application

- Muffler filling for power sport vehicles (motorcycles, snowmobile and ATVs)
- Industrial silencers.
- Acoustic and thermal insulation application.

Alternative texturized fiberglass roving can be directly injected into a muffler, plastic bag, and non-woven or winding around the perforated pipe and made into perform parts.
