

# Car Fire Blanket

The most efficient way to isolate and extinguish car fires, even in electric vehicles. Any car fire is dangerous and toxic. A car fire in a gas station, road tunnel, car park or passenger ferry can be a disaster. The Car Fire Blanket enables you to contain the flames, smoke and toxic fumes in a car fire in seconds and extinguish it in minutes. It's the only solution that can effectively handle fires in electric cars.

Size	6mx8m(20ftx26ft)	6mx9m(20ftx29ft)
Weight	26kg (58lbs)	29kg (64lbs)
Material	High temperature resistant fire proof Silicone coated High silica cloth. High temperature stands 550°C. 1100°C	
Smart bag	Waterproof bag, carried as a backpack or a bag for easy portability	
Car Size	Handles normal size vehicles up to SUVs such as Land Rovers, XC90 etc.	
Application	The fire and smoke are isolated within seconds of spreading the blanket over the car Ideal solution for parking garages, shopping centers, hospitals, hotels, boat ferries, car dealerships, metropolitan areas etc.	

Unroll the blanket in front of or behind the car/ burning object.  
 Grab the handles in the corners, and pull over the blanket in one movement.  
 Wrap the blanket tightly around the car to reduce the supply of oxygen.  
 Fire is contained stopping the spread of smoke and fire.
